

DATASHIELD®

DataShield offers managed and monitored services that can be customized and scaled to provide your organization with a security information and event management (SIEM) platform that leverages one of the leading information security systems. Our managed services provide you with expert resources that can quickly assess potential security threats and risks, maximize the functionality of each solution, and provide various levels of daily management and monitoring based on your security needs.

Managed & Monitored Services

We offer a comprehensive portfolio of managed and monitored security and networking solutions via our in-house DataShield Protect Solutions. Our solutions are customized to meet the specific needs of small, medium and large organizations, and are focused upon the management or monitoring of SIEM systems and supporting platforms. By utilizing our managed or monitored services, organizations with scarce IT resources can focus on their core business functions.

With international service delivery capabilities, DataShield provides your organization with innovative network and information security services, while keeping our help desks located in the United States. Leveraging a process-based approach centered upon the foundation of the quality management system allows our team to deliver innovative solutions, optimize our clients' operations and provide measurable risk reduction.

AS YOUR TRUSTED PARTNER IN RISK AND THREAT MANAGEMENT, DATASHIELD OFFERS:

- 24/7/365 monitoring of your network activity.
- A proven standard of responsiveness, flexibility and performance.
- Full responsibility for all aspects of maintaining, monitoring and administering your security technologies.
- Reduced complexity in security management, threat prevention and performance of due diligence.
- IT productivity driven by improving system availability and reducing risk.
- Secure storage of event information on your premises.
- Dedicated security analysts located in our security operations center (SOC).
- Reports customized to your specific needs.
- Forensic analysts who can drill down through events that trigger security threats.
- Filtering analysts who can query and filter events to search and identify data by any user-defined attribute.

enVision

With enVision, your security-operations team has a solution for addressing network-security and compliance-management challenges. enVision is an SIEM platform, which enables security professionals to collect and analyze log and event data that to identify high-priority security incidents as they occur.

Analytical software turns the unstructured raw data into valuable business information, giving administrators actionable insights to help simplify compliance, optimize incident management, and secure virtual and physical networks.

- With real-time security-event alerts, monitoring and drill-down forensic functionality, enVision gives administrators the visibility and understanding of how their network is being used. Threats and risks to the infrastructure and applications, such as root attacks on critical systems or compromised data, become more transparent so that effective action can be quickly implemented to mitigate those risks in the future. Intuitive forensic tools for investigating potential threats and compliance challenges provide business-critical visibility into end users' specific behaviors, allowing for effective remediation by your security and operations teams.

Features and Benefits

INCIDENT RESPONSE

- Optimize incident management by leveraging enVision for real-time correlation and investigation.
- Enable real-time notification of high-risk events and alerts across virtual and physical environments.
- Spend more time remediating incidents and less time managing them.

SECURITY FORENSICS

- Investigate threats and insider risk using the enVision forensics tool, Event Explorer.
- Reduce the effort of analyzing and investigating millions of events to remediate threats and "trusted insider" risk.

COMPLIANCE REPORTING

- Simplify your compliance reporting process with compliance-specific, out-of-the-box reports and alerts.
- Reduce time and effort by automating your compliance reporting.

Learn more about the comprehensive portfolio of consulting, assessment, solution integration and managed-monitored services offered by the expert team at DataShield.
